

JavaScript Test Paper on Array, Map, Reduce & Filter

- 1) Write a JavaScript function to find the maximum element in an array.
- 2) Write a JavaScript function to check if an array contains a specific element.
- 3) Write a JavaScript function to sort an array of numbers in ascending order.
- 4) Write a JavaScript function to remove duplicate elements from an array.
- 5) Write a JavaScript function to find the Union and Intersection of the two sorted arrays.
- 6) Use filter to return an array of even numbers from a given array.
- 7) Use map to convert an array of temperatures in Celsius to Fahrenheit.
- 8) Use reduce to find the maximum value in an array of numbers.
- 9) Use filter to return an array of names starting with a specific letter from a given array of names.
- 10) Use map to extract the age property from an array of objects and return a new array of ages.
- 11) Use reduce to concatenate all strings in an array into a single string.
- 12) Use map to square each element in an array and then reduce to find their sum.
