

Social Media Platform Application

Application Endpoints

User & Profile Management APIs

Domain Ownership: Users, authentication-ready profile operations

Reasoning: Core entity, foundational for all other modules

Endpoints

- **Create User**
 - POST /users
- **Get User by ID**
 - GET /users/{userId}
- **Get All Users (paginated)**
 - GET /users
- **Update User Profile**
 - PUT /users/{userId}
- **Update Profile Picture**
 - PUT /users/{userId}/profile-picture
- **Delete User**
 - DELETE /users/{userId}

Read-only Relationship Views

- **Get User's Posts**
 - GET /users/{userId}/posts
- **Get User's Friends**
 - GET /users/{userId}/friends

Post, Comment & Like APIs

Domain Ownership: Content creation and engagement

Reasoning: High-traffic functional module, cohesive CRUD + interactions

Post APIs

- **Create Post**
 - POST /posts
- **Get Post by ID**
 - GET /posts/{postId}
- **Get All Posts (feed with pagination)**
 - GET /posts
- **Update Post**
 - PUT /posts/{postId}
- **Delete Post**
 - DELETE /posts/{postId}

Comment APIs

- **Add Comment to Post**
 - POST /posts/{postId}/comments
- **Get Comments for Post**
 - GET /posts/{postId}/comments
- **Delete Comment**
 - DELETE /comments/{commentId}

Like APIs

- **Like a Post**
 - POST /posts/{postId}/likes
- **Unlike a Post**
 - DELETE /posts/{postId}/likes/{userId}
- **Get Like Count for Post**
 - GET /posts/{postId}/likes/count

Friendship & Social Graph APIs

Social Media Platform Application

Domain Ownership: Friend requests, acceptance, relationship state

Reasoning: Encapsulates complex business rules (pending vs accepted)

Friend Request APIs

- **Send Friend Request**
 - POST /friends/request
- **Accept Friend Request**
 - PUT /friends/{friendshipId}/accept
- **Reject Friend Request**
 - PUT /friends/{friendshipId}/reject

Relationship Queries

- **Get Friend List**
 - GET /friends/{userId}
- **Get Pending Friend Requests**
 - GET /friends/{userId}/pending
- **Remove Friend**
 - DELETE /friends/{friendshipId}

Messaging & Notification APIs

Domain Ownership: Private communication & system alerts

Reasoning: Asynchronous, user-centric communication features

Messaging APIs

- **Send Message**
 - POST /messages
- **Get Messages Between Two Users**
 - GET /messages/conversation?senderId=&receiverId=
- **Get Inbox for User**
 - GET /messages/inbox/{userId}
- **Delete Message**
 - DELETE /messages/{messageId}

Notification APIs

- **Get Notifications for User**
 - GET /notifications/{userId}
- **Create Notification (system-triggered)**
 - POST /notifications
- **Mark Notification as Read**
 - PUT /notifications/{notificationId}/read
- **Delete Notification**
 - DELETE /notifications/{notificationId}

Group Management APIs

Domain Ownership: Community & group administration

Reasoning: Independent module with admin-controlled lifecycle

Group APIs

- **Create Group**
 - POST /groups
- **Get Group by ID**
 - GET /groups/{groupId}
- **Get All Groups**
 - GET /groups
- **Update Group Details**
 - PUT /groups/{groupId}
- **Delete Group**
 - DELETE /groups/{groupId}

Group Membership (future-ready design)

- **Add User to Group**

Social Media Platform Application

- POST /groups/{groupId}/members
- **Remove User from Group**
 - DELETE /groups/{groupId}/members/{userId}
- **Get Group Members**
 - GET /groups/{groupId}/members
